

How-To Guide for WooCommerce with DHL Parcel

Shipping Labels

WooCommerce > Orders > Select Order

In this overview, you can amend the address details if required (1). On the right-hand side of the screen, you'll see the shipping options that your customer has selected (2). At this stage you can still select the 'Signature' and 'Letterbox parcel' option if applicable (2). Once you've checked the order details are correct, click 'Create' (3).

Once label confirmation is shown below the button (1), you can proceed to download your label from the top right-hand side of the screen (2). A shipment number will become visible which you can use to track the parcel.
